

Non-Standard Partitioning

3-Digit Numbers

Partition 356 into different forms.

356

hundreds

tens

ones

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Two ten-blocks have been traded to the tens. Fill in the missing numbers.

$$3 \text{ hundreds} + \underline{\hspace{1cm}} \text{ tens} + \underline{\hspace{1cm}} \text{ ones} = 356$$

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} + 26 = 356$$
