

Start

Roll a dice to move around the outer squares. If you find a matching number in the centre, cover it with a counter. First player to place 4 counters in a row wins!

...is between 3,500 & 4,500

...has fewer than 5 ones

...is less than 1000

...is an even number

...has 5 thousands

...has 1 ten

...is an odd number

...has a zero

Take that!
Remove one of your opponent's counters

Place Value... 4 in a Row!

614	908	9,345	633	219	6,412
4,406	61	567	4,526	47	5,511
82	938	4,052	7,045	3,304	4,061
3,518	84	5,378	562	6,216	128
156	504	632	2,415	284	7,302
4,361	752	625	38	18	7,261
224	761	4,419	45	9,134	704
873	9,140	88	637	227	1,006

...is an odd number

...has 4 hundreds and 3 tens

...has a zero

...is an even number

...has 6 tens and 1 one

...has fewer than 4 hundreds
