

Subtraction Race

How to Play
 Need: dice, markers
 For 2-4 players

The goal is to reach one of the finish flags. Players start from either **Start** space and take turns to roll the dice.

Find the **difference** between the two numbers by subtracting the smaller number from the larger number. The player may then move to an adjoining space which shows that same difference.

Eg. If 6 and 4 are rolled, the **difference** is 2. A move can be made to an adjoining space that shows a 2.
