

## Word Problems- Dividing by 2 digits [1]

**First** Draw a box around the question.

**Second** Underline key words.

**Third** Circle important numbers.

**Fourth** Solve the problem. Show all your thinking.

1. Grace is organising her photos into an album. She will place 16 photos on each page. Altogether she has 224 photos. How many pages will she need for all of her photos?

2. Wally has 456 chocolates. She wants to share them evenly into 24 bowls for the party. How many chocolates should she put in each bowl?

3. A company needs to send 1,134 items of clothing to New Zealand. If each parcel can hold 27 items, how many parcels will be needed?

4. Greg is a barber. He charges a flat fee of \$28 for each customer. At the end of the day, he calculated that he made \$588. How many customers did he serve?

5. The farmer planted a total of 495 apple trees in 33 even rows. How many apple trees were in each row?
