

Fact and Opinion

A fact:

can be proven by research, facts and figures, survey results and other methods.

An opinion:

can't be proven because it is a matter of personal belief or judgement.

Star Gaming Magazine p3

What's new in gaming?

An exciting new video game console has been released this week. We have spent all week playing the PocketPlay. Just how good is it?

Read on to find out!

PocketPlay

The PocketPlay is a portable console which means it is designed to take with you to work, school or anywhere you happen to be going. This will mean no more boring car rides! It comes with a screen protector (screen protectors are a must!) and has 4 different levels of brightness. The PocketPlay is available in 5 fun colours. The orange and the blue in particular look fantastic.

The PocketPlay is able to connect to the internet so you can play against your friends all over the world.

There are currently 8 games out for the PocketPlay. This might seem like a small number, but the games that are out are excellent!

With more games on the way (including *Sally's Quest* in less than a month), the future of the PocketPlay looks bright!

Separate the fact from the opinion. Remember, facts can be proved while opinions can't!
