Read the following passage about deserts.

Use the checklist at the bottom of the page to see what is missing.

Deserts

Because deserts are so dry not many plants and animals can survive.

The plants and animals that do live in deserts have features to suit these harsh conditions

due to a lack of rainfall most desert animals get their water from their food. Other animals, like camels, store

fat in there bodies. This provides them with energy during periods they cannot find food. Many desert animals are small because small animals dont need as much water.

Camel

some desert animals are nocturnal this means that they are active during the night when temperatures are much cooler these animals escap the high day time temperatures by sleeping in a spot of shade or in a burrow. This stops animals losing as much warter as they would if they were active during out in the heet of the day

4 missing full stops

Read the following passage about deserts.

Use the checklist at the bottom of the page to see what is missing.

Deserts

Because deserts are so dry, not many plants and animals can survive. The plants and animals that do live in deserts have features to suit these harsh conditions.

Due to a lack of rainfall, most desert **animals** get their water from their food. Other animals, like camels, store fat in **their** bodies. This provides them with energy during periods **they** cannot find food. Many desert animals are small because small animals don't need as much water.

Some desert animals are nocturnal. This means that they are active during the **night** when temperatures are much cooler. These animals **escape** the high day time temperatures by sleeping in a spot of shade or in a burrow. This stops animals losing as much **water** as they would if they were active during out in the **heat** of the day.
