

Forces

Push or Pull?

A force is a push or a pull on an object. When the direction of the force is towards the object applying the force, it is a pull force. When the direction of force is away from the object applying the force, it is a push force.

Cut and paste to show whether the following show push forces or pull forces.

Do any show both push and pull forces? Explain your thinking.

Push force		Pull force
