

# Solving 3x Facts Extended

## Multiplication Strategies

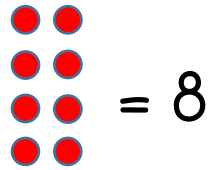

2x facts can be used to help solve 3x facts.

To solve...

$$4 \times 3$$

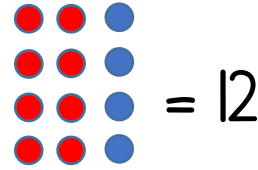

think...

$$4 \times 2$$

then add another group of 4

... 9, 10, 11, 12

$$4 \times 3 = 12$$

Think  $104 \times 2$       +  $104$  more

$104 \times 3$	208	
----------------	-----	--

$$104 \times 3 = \underline{\hspace{2cm}}$$

Think  $\_\_\_ \times 2$       +  $\_\_\_$  more

$45 \times 3$		
---------------	--	--

$$45 \times 3 = \underline{\hspace{2cm}}$$

Think  $\_\_\_ \times 2$       +  $\_\_\_$  more

$123 \times 3$		
----------------	--	--

$$123 \times 3 = \underline{\hspace{2cm}}$$

Think  $\_\_\_ \times 2$       +  $\_\_\_$  more

$212 \times 3$		
----------------	--	--

$$212 \times 3 = \underline{\hspace{2cm}}$$
