

Clear the Board

Objective: Be the first to remove all your counters from the board.

Need: 2 players, 7 counters of the same colour per player, pencil, paper clip.

Set Up:

Decide on a spinner to use and use 'scissors paper rock' to decide who is Player 1.

Player 1 places one of their counters under a number. Player 2 places one of their counters under a number.

Continue until all counters have been placed.

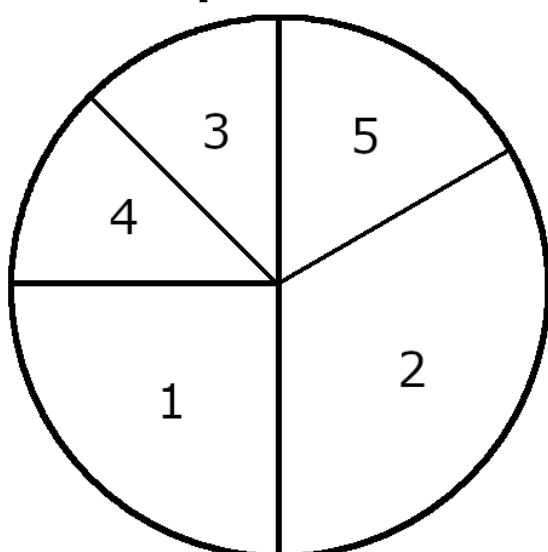

Play:

Spin. After each spin, both players are allowed to remove **one** of their counters if they have one placed underneath the matching column. For example, if the spinner lands on '3', each player may remove one of their counters from under the '3' column. first player to remove all their counters is the winner!

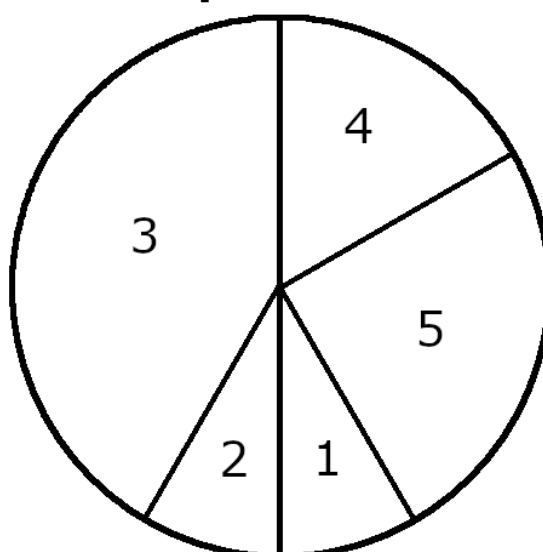

1	2	3	4	5

Think about the probability of the spinner landing on each number.

Spinner 1

Spinner 2

(use a paper clip underneath the tip of a pencil)
