

Information Report Jumble

Cut and paste to unjumble the information report on rabbits.

Rabbits like to eat! They are plants eaters. They eat grass, fruits, vegetables and even flowers. Rabbits go looking for their food early in the morning and again in the late evening.

Rabbits are very interesting animals. They do more than just hop!

Rabbits

Rabbits are mammals. They have long ears, large feet, soft fur and a small tail. They have strong back legs which lets them hop very well. A rabbit's back legs are so strong, they can also use them to help fight off other animals such as foxes and wolves.

Rabbits live in forests, grasslands and meadows. Rabbits can also live in deserts and in very cold places. Most rabbits dig tunnels into the ground to make dens. These help keep rabbits safe. Rabbit dens are called 'warrens'. Rabbits in the wild only live for about 2 years.
