Measuring Area
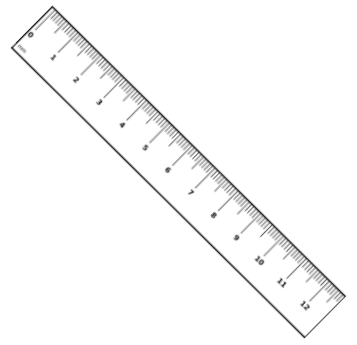

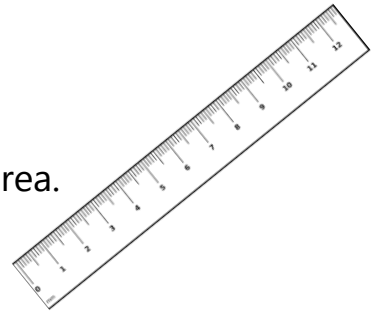

Check before printing:

The default setting of many printers is to scale the page to a slightly smaller size (eg. 96%). For the measurements to print accurately on this resource, it must to be printed at 100% size.
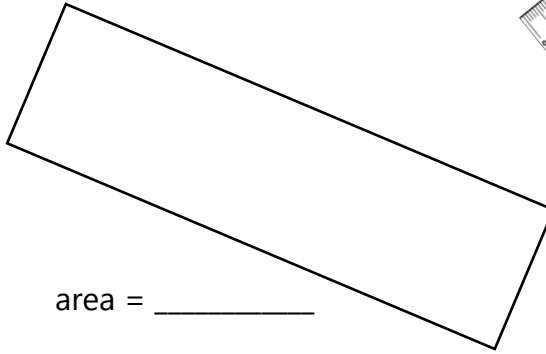

You will find the option to check/change the scale in the printer dialogue box under *more settings*, or *printer properties*. Select 'actual size', or '100%'.
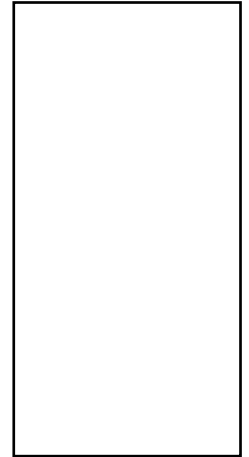

Measuring Area

Use a ruler to measure the length and width of each shape.
Record the dimensions of each shape and then calculate the area.
